by MK Illumination

A solid dark brown circular badge containing the white text '2011'.

“Creativity is inventing,  
experimenting, growing,  
taking risks, breaking  
rules, making mistakes,  
and having fun.”

Mary Lou Cook – American community activist, calligrapher and author

# LIMITED conceptual festive lighting

With our loving attention to detail and the exclusive artistry of our skilled workers, we are able to create bespoke displays and high-quality designs. This is encapsulated in the Limited Series.

The creativity of our craftsmen helps to transform our ideas into top-quality products. From the smallest of ideas we are able to create pieces of art, one-off creations – made with feeling to meet the discerning needs of our customers. Since 2009, we have been working high-quality crystal raindrops and crystal pearls into our three-dimensional indoor and outdoor lighting displays. These products have become the real gems of our collection and our customers have fallen in love with them – reason enough to continue developing this range. Our inspiration has been found in the style collections „Glory“ (the glamorous) and „Joy“ (the playful).

#### **2011: A new relationship**

„Limited“ products are an expression of particularly high-quality taste – glamorous, exquisite, and stylish. For the coming season, we shall be combining our „Limited“ displays with new Organic Materials, produced using raw materials from sustainable sources.

#### **The fabrics which make new decorative dreams come true**

Yet another innovation this year is the creative combination of our hand-made, three-dimensional displays with selected high-quality fabrics. Available for indoor use only. We use only materials which correspond to European safety standards. (B1, M1)

#### **Honest Craftsmanship**

The central birthplace of our countless design ideas is right next to our R&D department – in the in-house design office. Our motto “everything under one roof” is both the cornerstone and quality seal for our unique and distinctive style. Each season in a production area of more than 6,000 m<sup>2</sup>, up to 180 employees manually model and manufacture our motifs. Each motif is then checked with great precision to ensure they comply with European safety standards before they are allowed to leave the premises and be used in creative displays. To us, it is a natural business initiative to constantly and purposefully train and develop such manual skills. This is the only way to create unique products that meet the highest design standards.

## Environment

In our sector, we spearheaded the campaign for a better environment, making it our task to offer our customers not only the best, but also – in the interests of a sustainable, light environmental footprint – the most ecologically friendly lighting technology. Our clear understanding of our responsibility towards man and the environment gave rise to our commitment, both to use energy-efficient lighting increasingly in our products and to campaign incessantly for its use. In this way, we wish to make a significant contribution towards a permanent reduction in CO<sub>2</sub> emissions and its subsequent environmental damage.

#### **Lighting the future: our LED technology**

Our LED technology is the first choice for decorative illumination and, we at MK illumination are investing a great deal of time and money in its continued development. Just like MK, our customers are also committed to this „light of the future“ because it consumes extremely low energy levels, has a negligible effect on the environment and is cost-effective.

#### **The new „Organic Materials“ generation**

The proportion of „organic materials“ in our production is rising month-on-month. The so-called „renewable raw materials“ are based completely, or in an agreed proportion, on agricultural raw materials such as (amongst others) starch, sugar, vegetable oils and cellulose (wood, natural fibres, straw) as well as special organic molecules like lignin or rubber. The proportion of agricultural raw materials in each Organic Material is at least 20%. The expression „organic materials“ is still relatively young. At MK we’re using the term as a collective label to describe the new organic based materials used to create our new MK Organic range.

The „organic materials“ used in our concepts are made up of considerably more than 20% wood. We justifiably refer to these materials as organic because:

- a considerable proportion of the material is derived from renewable sources
- the proportion of petrochemical source materials is significantly reduced
- the net effect on the planet’s CO<sub>2</sub> levels is markedly better than with standard polymers
- they are a real-life contribution to resource-saving sustainability

#### **„Good“ is not good enough!**

Zukünftig arbeiten wir mit Lieferanten, die Holz aus nachhaltig kontrollierter Forstwirtschaft aus einem Umkreis von vorgenommenen 50 km verwenden, inkl. dem PEFC-Zertifikat (PEFC – Programme for the Endorsement of Forest Certification Schemes). Hand drauf.

# MK Illumination Worldwide

## MK Illumination

A regional business  
with a global reach.

Innovative lighting displays and effects, when deployed correctly, are a spectacular sight to behold. This explains the marked global growth over the last 14 years, both in demand and in quality expectations, for illumination concepts. It also explains the emergence of decorative illumination as an advertising medium.

At MK Illumination we are the European market leaders in decorative and energy-efficient illumination displays, having established a distinguished reputation as a reliable partner with a breadth of industry knowledge. In 23 countries throughout the world, we maintain independently-run subsidiaries, each of which draws on their local and regional connections to act quickly in the interests of the customer. Strategic direction is provided by our headquarters in Innsbruck (Austria), while our state-of-the-art production facility in Slovakia supports them with all technical requirements.

### Customer focus - the source of our best results

Our business is built upon our international experience, regional knowledge and direct customer contact. This customer-friendly approach enables us to deliver bespoke displays, top-quality products and cost-effective logistics. When we undertake new projects, we do so on the basis of extensive local knowledge and knowing that we can draw on the international experience of our entire organisation. This has helped us to develop an extensive client portfolio including shopping centres, hotels and restaurant sector, as well as public and private-sector organisations.

September 2011

### 15 Years of MK Illumination – a light conquers the world

Looking back into the past is not a backward step. In fact reflection can give a business considerable forward impetus; reviewing development, showing continuity and revealing individual strengths. Behind MK Illumination lies 15 years of planning and development of visionary illumination concepts, each created with unique character using the latest technology. Playing an active role in the development of lighting technology keeps us one step ahead of the competition and makes our displays stand out from the crowd. Sensitively, we transform buildings, public squares and other locations into magical places that attract people and stir their emotions. This is all made possible because of our experience and ability to understand each customer's individual requirements.

LED Crystal Forest

The image shows three Crystal Christmas Trees arranged horizontally. The tree on the left is labeled 931-455 and has a height marking of ~130 cm. The middle tree is labeled 931-456 and has a height marking of ~185 cm. The tree on the right is labeled 931-457 and has a height marking of ~210 cm. Each tree is composed of numerous small, glowing crystal-like points forming a conical shape.

The image displays three versions of the "Crystal Christmas Tree oval" at different heights, indicated by vertical dimension lines:

- Left:** Height is approximately 130 cm. Below the tree is a small pine cone icon followed by a plus sign.
- Middle:** Height is approximately 165 cm. Below the tree is a small pine cone icon followed by a plus sign.
- Right:** Height is approximately 210 cm. Below the tree is a small pine cone icon followed by a plus sign.
